

BigBags: Dbulk

PP or PE maritime container inliner that offers cost savings, keeps quality and brings flexibility in reference to other bulk bag methods.

DBulk offer cost saving, quality and flexibility in reference to other bulk bag and storage methods. They provide protection both for the product against the container floor and walls, and for the container itself against the stored product. This allows containers to be used as a low cost alternative to Big Bags or tanker trucks for the transport of bulk dry goods.

- Both the goods and the container are protected against contamination DBulk bags are suitable for direct contact with foods.
- Easy to charge and discharge by reducing manual handling and charging time.
- Increased quantity of the filling product.
- ISO-9001 certified quality control during the entire manufacturing process.
- Manufactured always according to our customer requirements.
- 100% recyclable.
