

DURAPOLS® AGRO 16X10

Insect Screen/ Anti-Aphids Net / Anti virus net/ 40 Mesh

Grupo Condepols
Packaging Solutions & Wood Plastic Composite
& Agriculture Nets

Overview

DURAPOLS® Agro 16x10 is a kind of fabric commonly used to cover many type of structures of crop protection such as multispan greenhouses or lightweigh frames made up with metal poles and wires (nethouses in dry climate areas), and frequently installed in cenital windows or roofings. It is used for blocking **aphids** or **white flies** All these insects become a threat for crops as a virus vector, that is the main reason to look for insulation by reducing pesticides consumption. This

type of agrotexitle in darker colors (grey or black) provides sunshade protection as well as insulation, becoming more versatile. A great number of cenital windows of greenhouses use this type of material, **DURAPOLS® Agro 16x10**

What else

High UV Stability

Better environment for the plant

Breathable fabric.

Windbreak protection

Lower evapotranspiration

Sunshade protection

White fly and Aphids

Organic Farming

ECO

Light diffudion

Tearing resistance.

Hole Size

Other details

There are 2 alternatives of this fabric: **DURAPOLS® Agro 20x10** and **DURAPOLS® Agro 21x11**. Depending on Relative Humidity conditions or Ventilation needs we will pick on or other type. Installing theses nets in cenital windows of greenhouses makes easier "Chimney Effect" so that we could handle heat in excess.
