

DURAPOLS® AGRO 20X10

Anti thrips / Anti aphids / Anti virus net / 50 Mesh

GrupoCondepols
Packaging Solutions & Wood Plastic Composite
& Agriculture Nets

Overview

DURAPOLS® Agro 20x10 is a covering fabric for a wide range of greenhouses. It's hole size is smaller than in **DURAPOLS® Agro 16x10** increasing insulation level. It is used for blocking **aphids, thrips, white flies** and **leafminers**. It is usually installed on the sidewalls and frontwalls, in the first 3-4 meters high from the ground due to the higher presence of insects from the statistic point of view

It is quite used in all those greenhouses and nethouses areas in the world, where pest levels are high enough to constitute a threat for the crops.

What else

High UV Stability

Better environment for the plant

Breathable fabric.

Windbreak protection

Lower evapotranspiration

Sunshade protection

White fly, thrips, aphids, leafminer

Organic Farming

Light diffusion

Tearing resistance

Hole Size

Other details

There are 2 alternatives of this fabric: **DURAPOLS® Agro 16x10** and **DURAPOLS® Agro 21x11**. Depending on Relative Humidity conditions or Ventilation needs we will pick on or other type. It is used to make inner walls inside the greenhouses or to cover antechambers to get into the greenhouses or nethouses.
