

DURAPOLS® AGRO 21X11

Anti Thrips/ Anti Aphids / Anti Virus / 55 Mesh

Grupo Condepols
Packaging Solutions & Wood Plastic Composite
& Agriculture Nets

Overview

DURAPOLS® Agro 21x11 is the product of our insect nets range with the smallest hole size, even more than **DURAPOLS® Agro 20x10**. This type of fabric is used to achieve the highest insulation standards, without accepting to sacrifice ventilation. It becomes an excellent insect screen against **aphids, thrips, white fly** and **leafminers**.

It is commonly installed on the sidewalls of greenhouses and nethouses. All those growers aiming to have an excellent in-

insulation and looking for to avoid pesticides applications, tent to pick this material as a physical barrier. The thickness of the yarn (Φ 22mm) allows reducing the hole size without refusing the porosity, so important to keep ventilation without sacrificing insulation.

What else

High UV Stability

Better environment for the plants

Breathable fabric

Windbreak protection

Lower evapotranspiration

Sunshade protection

White fly, thrip, aphid, leafminer, Tuta

Organic Farming

Light diffusion

Tearing resistance

Hole Size

Other details

This fabric is ideal to be installed in access antechambers of greenhouses and nethouses. As long as there is a good management of the installations, it will be a high efficiency to block the white fly. In comparison to **DURAPOLS® Agro 16x10** and **DURAPOLS® Agro 20x10** it offers more insulation. It is used as well to block red spider and Tuta.
