

DURAPOLS® AGRO Sombreo 45%

Sombreo / Media Sombra / Sarán / Sombreo 45%

GrupoCondepols
Packaging Solutions & Wood Plastic Composite
& Agriculture Nets

Overview

DURAPOLS® Agro Shade 45% is the family range of nets mostly used in agriculture. Its main function is the regulation of the sun radiation incident on crops. It is quite profitable to improve the environment. Likewise it involves a relevant water saving considering it reduces evapotranspiration and T° .

It is a heavy duty agrotexil ("LENO FABRIC") in comparison to its weight woven with monofilament (warp) and HDPE raffia tape (weft) becoming more resistant in comparison to other

shading nets (Raschel type) present in the market. Depending on the color of these fabrics, they will provide different shading rates from 25% up to 45% shading approximately.

DURAPOLS® Agro Sombreo 45% Silver has additional capacity to reduce temperature underneath itself between 4°C and 6°C .

What else

High UV stability

Lower vegetal stress.

Breathable material

Windbreak protection

Lower evapotranspiration

Sunshade protection

Infrared radiation filter

Tearing resistance

Temperatura reduction

Other details

This type of net is the most frequently used in horticulture, although it is for ornamental plants, seedling or fruit trees production in nurseries. Many berries producers place them directly over plastic polytunnels.

Likewise it can be used as an alternative cost-effective to provide shading as a climate screen in high tech greenhouse. It can play an excellent role in ot very demanding conditions.

Color Range

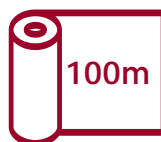

Blanco, Plata, Negro, Verde, etc.

For other different color, please ask the Sales Department. Combination of colors either in warp or weft available in order to get the appropriate tone and shading rate desired.

Sizes

Standard rolls from 1,00 m up to 5,00 m.
Standard lengths: 100 m, up to 1000 m (**jumbo**).
Tailored-made rolls available over 5 meters made up with **Sewing Line Machine** for Big jumbo which allows a good finishing for the rolls.

Packaging

Standard and Jumbo rolls: Cardboard cores, retractable film and adhesive tracking labels

DOMESTIC AND INTERNATIONAL SHIPPING:

Jumbo rolls loaded directly into trucks or containers.

Standard rolls palletized.

PALLETISATION:

>STANDARD ROLLS:

Widths: Up to 2,50 m

Length: 100 ML

Each pallet 25 Ud

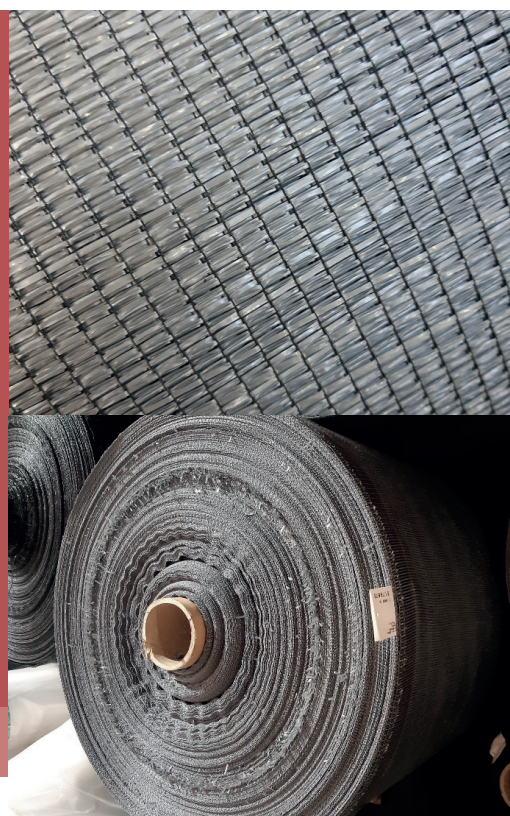

>STANDARD ROLLS:

Widths: From 3,00 to 5,00 m

Length: 100 ML

Each pallet: 12 Ud (folded)

Other lengths and widths
subjected to other configurations
