

DURAPOLS® AGRO 6X9

Mosquito Net / Anti Insect 6x9 / Windbreak /20 Mesh

GrupoCondepols
Packaging Solutions & Wood Plastic Composite
& Agriculture Nets

Overview

As well as **DURAPOLS® Agro 6x6** it is quite used to cover fruit orchards. Its weight is slightly higher, but its hole size is a little bit smaller, providing more insulation.

Black, green or grey colors provide higher shading rate.

This agrotexil can slow down the entry of **Tuta absoluta** to the different crops. This pest affects mainly tomato crops as well as peppers or eggplants.

It can affects leaves, sprouts or fruits with a low incidence so that it can reduce outputs and commercial value of the production, with a negative economic impact.

What else

High UV stability

Better environment for the plants

Light and easily installable

Windbreak protection

Lower evapotranspiration

Sunshade protection

Tuta absoluta

Organic Farming

ECO

Light diffusion

Tearing resistance.

Other details

This material is used as well as scaffolding net to cover building facades.

It can be used as a cost-effective tarpaulin for trailers with transport bulk construction materials or agroindustrial products such as cotton, cereals, tomatoes or olives.
